### u trek coffee table

Design Niels Bendtsen  
 Casters, wood, glass top  
 Made in British Columbia by Bensen

**Finish: Grey oak with glass**

U Be and U Trek are reformulations of the Bensen U Table. The veneered frame holds the glass top in a finely machined channel creating 2 levels of storage. Inset wheels not only make the U Trek coffee table simple to move around within a room, but also give the table the appearance of floating above the floor. U Trek's clean lines and mobility result in a piece that simultaneously floats and anchors in its surroundings.

grey oak + \$110.00

The finish is made up of select solid wood and veneers that are carefully matched, sliced and stitched together for harmonious pattern and consistent coloration. A clear lacquer coat protects the veneer from daily use while bringing out the natural colors and patterns of the select species. The glass used for the top has polished edges making it soft to the touch and non-marking to surrounding wood. Multi-directional swivel steel casters with rubber treads offer smooth travel over a variety of floor surfaces.
