## UNDERCABINET LIGHTING

PRO-SERIES LED

3000K LEDs

**UPL09, UPL14,  
UPL22 and UPL30**

Project: \_\_\_\_\_

Fixture Type: \_\_\_\_\_

Location: \_\_\_\_\_

Contact/Phone: \_\_\_\_\_

### PRODUCT DESCRIPTION

The Pro-Series LED modular series with integral electronic driver operates 3000K LEDs for maintenance free 50,000 hour life using 1/8 the energy and virtually no heat when compared to halogen & xenon. Pro-Series LED fixtures are optimized for fast permanent installation, mounting either flush to the rear backsplash or to the front lip of cabinetry to suit project conditions and homeowner preference. Pro-Series LED fixtures are environmentally friendly and contain no harmful mercury.

### PRODUCT SPECIFICATIONS

**LEDs** Utilizes Nichia nominal 1-watt warm-white 3000K LEDs  
 • Light output equivalent to Pro-Halogen & Pro-Xenon fixture series  
 • Provides 50,000 hour service life.

**Driver** Integral electronic 120-volt to 300mA constant current driver is accessible without having to remove fixture.

**Housing** Slim 1" profile • Modular plug-together design  
 • Extruded Aluminum • Designer white, black, brushed bronze, or brushed silver.

**Diffuser** Clear prismatic tempered glass lens for maximum light transmission • Reverse-angled to minimize perceived brightness.

**Switch** Convenient integral On/Off rocker switch.

**Labels** UL Listed.

### INSTALLATION

UPL series fixtures are optimized with a center rear wiring access compartment and push-in 3-wire electrical connectors for quick electrical connection without having to open the fixture or remove the lens. Rear wiring access compartment covers provided with push-in connector for non-metallic cable and knockouts for feed thru wiring capability. Multiple off-center knockouts provided in 14", 22" and 30" fixtures. Die-cast fitting for 3/8" flexible metal conduit supplied in a hardware pack. Fixtures may be mounted flush to the backsplash or up against the front lip of the cabinetry using captive mounting screws.

**Portable** To install as a portable fixture, use the optional 3-wire grounded cord & plug (ULH-CP sold separately).

**Optional Direct Wire** Optional direct-wire module (ULH-DWM sold separately) facilitates code-compliant installation of fixture at front edge of cabinetry. Supplied with 36" field-shortenable jumper cord to bring power to either end of the fixture.

**Electrically Connecting Multiple Fixtures** Connect multiple fixtures for up to 5 amps maximum combined operating current. Fixtures may be electrically joined together using either the straight joiner connector supplied with each fixture or the optional JC3 jumper cords. See accessories table for lengths and colors. See engineering data table for input current draw of each fixture size.

### PRO-SERIES LED 5 MINUTE DIRECT-WIRE INSTALLATION

**Step 1** Attach supply wires to rear access cover.

**Step 2** Connect supply wires to fixture leads using push-in connectors.

**Step 3** Mount fixture to cabinet bottom using captive mounting screws.

## ADVENT SPECIFICATION SHEET

### MONET INTERIOR CEILING AIC10483

JOB NAME  
67 liberty

TYPE  
C

#### Dimensions

W	L	H	MC
6.7 in	38.0 in	2.5 in	19.0 in
17.0 cm	96.5 cm	6.4 cm	48.3 cm

#### Weight

Hanging weight: 25.0 lb (11.4 kg).

With a flash of style and a touch of class, Advent Monet makes a lasting impression. Distinctive motifs provide an artistic twist, while vivid color gels and luminous glowing edges complete an energetic design. The Monet family consists of interior sconces, pendants and ceiling mounts, as well as exterior wall mounts. Efficient linear fluorescent lamping and long-lasting LED options allow Monet to empower a space in a simple, elegant form. Monet's interior ceiling luminaires are UL listed for Damp Locations and is surface mounted, fully recessed models also available. In addition to being compatible with the Armstrong® TechZone™ Ceiling System, Monet's ceiling mounts allow a lighting design to envelope an entire space. Interior Monet's white or optional colored face is balanced by a matching or white luminous edge.

#### Features

- Formed metal construction provides durable protection for internal components and is recyclable.
- Fixture design allows relamping without the use of tools, simplifying maintenance.
- External fasteners are not visible, providing a clean fixture design.
- Acrylic lens gives the fixture a unique identity with light reflected through the polished edge.
- Durable wood laminate faceplate option adds a warm, natural texture to a space.
- Fixture adds a splash of color to a space with theatrical color gels. Standard colors are available with other colors available upon request. Contact factory to customize a color gel that coordinates with your application.
- Embossed stainless steel-linear and crosshatch face plate option adds a unique, metal accent and texture to a space.
- Embossed stainless steel-linear face plate option adds a unique, metal accent and texture to a space.
- Standard thermoset polyester powder coat paint provides durable protection in a palette of color options. Custom colors available upon request.
- Integral electronic ballast utilizes the latest energy-saving technology to maintain consistent color temperature, CRI and lumen maintenance, while eliminating the need for remote mounting and simplifying installation.
- Integral 24V LED, Class II power supply included, eliminating the need for remote mounting, simplifying installation.

#### Technical Notes

##### Construction

- Optional motif is black, unless specified.

##### Electrical

- Fluorescent versions have integral electronic ballasts utilizing the latest energy-saving technology, providing prolonged lamp life and maintaining consistent color.
- Meets NEC 410.73 double-ended, fluorescent lamp ballast disconnect requirements.

- ETL listed to UL standards (US and Canada) for use in damp locations. Not recommended for exterior applications.

##### Lamping/lamp

- Fluorescent lamps are 3500K unless specified.
- Lamps included, with the exception of T8, T5 and incandescent.

##### Mounting

- Mounts to standard 4" octagonal junction box.
- Additional mounting structure and hardware required (by others).

## ADVENT SPECIFICATION SHEET

ROSWELL INTERIOR CEILING  
AIC8117

JOB NAME  
67 LIBERTY

TYPE  
F

The signature of the Roswell is its 1/2" thick green tint acrylic lens with a frosted inner surface and polished outer edge, giving the effect of glass without the additional expense or weight. Choose from a palette of both painted and metal finishes.

### Dimensions

W	H	RW	RH
14.5 in	2.0 in	10.5 in	2.7 in
36.8 cm	5.1 cm	26.7 cm	6.9 cm

### Weight

Hanging weight: 25.0 lb (11.4 kg).

### Features

- Frosted acrylic trim provides a unique, subtle green accent.
- Integral electronic ballast utilizes the latest energy-saving technology to maintain consistent color temperature, CRI and lumen maintenance, while eliminating the need for remote mounting and simplifying installation.

### Technical Notes

#### Electrical

- ETL listed to UL standards (US and Canada) for use in damp locations. Not recommended for exterior applications.
- Fluorescent versions have integral electronic ballasts utilizing the latest energy-saving technology, providing prolonged lamp life and maintaining consistent color.

#### Lamping/lamp

- Lamps included, with the exception of T8, T5 and incandescent.
- Fluorescent lamps are 3500K unless specified.

#### Mounting

- Requires recessed mounting.

### PRODUCT DESCRIPTION

Recessed MR16 downlight luminaire with 3 1/4" square aperture die cast reflector and tempered glass to protect lamp against water. Fixture has 50° visual cutoff to lamp and lamp image. Sealed Air-Loc housing eliminates leak-paths to ensure maximum energy savings and controls plenum sound transmission. Low profile TC housing is ideal for space restricted plenum applications and is for use in non-insulated areas, or where insulation is spaced at least 3" from housing.

### PRODUCT SPECIFICATIONS

**Reflector** Lensed, Die cast, parabolic reflector maintains low glare, tight corners, and 50° lamp and lamp image cut-off • Available in haze, black haze, wheat haze, or white finishes.

**Trims Style** Self Flanged and Flush Mount reflectors utilize precision wound double torsion springs for tight, secure fit to ceiling • Flange is same finish as reflector unless optional painted white flange is specified • Flush Mount trims must be used with FMASQ4 Flush Mount Adapter.

**Lens** Lampholder accommodates up to three (3) 2" captive accessory lenses • Supplied with stippled clear uniformity lens.

**Socket** Ceramic bi-pin socket with double blade nickel alloy contacts • Quick disconnect for simplified maintenance.

**Lamp** One 75W MR16 lamp.

**Transformer** 120V High efficiency (>90%) dual tap magnetic, toroidal transformer has a boost tap to compensate for dimmer losses, improving color temperature and lumen output • Potted to eliminate noise and vibration • High efficiency (>94%), high power factor electronic transformer also available.

**Dimming** May be dimmed using dimmers specifically designed for low voltage magnetic or electronic transformers; consult factory or dimmer manufacturer for additional information.

**Codes/Labels** UL and cUL listed for through branch wiring, wet locations • Meets energy code Air Leakage requirements per ASTM E283 • Product thermally protected against improper use of lamps • Union made.

**Proprietary Bar Hanger System** Patent pending Pro-VI™, telescoping bar hanger system with locking set screws, permits quick placement of housing within 24" O.C. joists or suspended ceilings • Robust bar eliminates flexing regardless of fixture position • Integral T-bar notch with locking tabs secures housing to suspended ceiling grid • Captive bugle-headed ring shank nail for quick one-step installation • Bar Hanger foot aligns to bottom of construction joist and breaks away for use in suspended ceilings.

**Junction Box** Rated for 8 No. 12 AWG 90° C through branch circuit conductors and includes (5) 1/2", (1) 3/4", and (4) Non-metallic sheathed cable knock-outs • Push-In electrical connectors for field connections.

## STILE SPECIFICATION SHEET

BRACE EXTERIOR WALL  
SEW10355

WET

ADA

Sleek and modern, the Stile brand provides the clean, appearance desired by today's architects and designers. Brace delivers maximized light output, as well as creates an inviting and comfortable space utilizing efficient T5 and T5HOs. UL listed for wet locations, this wall-mounted fixture offers remote or integral ballasts and various shielding options. Available in two distinct looks, this sleek luminaire presents versions satisfying ADA requirements. It has the ability to add the finishing touch to modern lighting designs, interior or exterior.

JOB NAME  
67 LIBERTY

TYPE  
E

## Dimensions

W	H	D	MC
1.5 in	36.6 in	4.0 in	16.8 in
3.8 cm	93.0 cm	10.2 cm	42.7 cm

## Weight

Hanging weight: 25.0 lb (11.4 kg).

## Features

- Extruded acrylic tube with aluminum end caps maximizes output and creates uniform illumination.
- Integral electronic ballast utilizes the latest energy-saving technology to maintain consistent color temperature, CRI and lumen maintenance, while eliminating the need for remote mounting and simplifying installation.
- Standard thermoset polyester powder coat paint provides durable protection in a palette of color options. Custom colors available upon request.
- Versatile design allows fixture to be mounted in any orientation.

## Technical Notes

## Electrical

- Thermally protected ballast limits operating temperature.
- Fluorescent versions have integral electronic ballasts utilizing the latest energy-saving technology, providing prolonged lamp life and maintaining consistent color.
- Class "A" sound rated ballast for use in low ambient noise applications.
- ETL listed to UL standards (US and Canada) for use in wet locations.
- Meets NEC 410.73 double-ended, fluorescent lamp ballast disconnect requirements.

## Finish

- Housing and mounting components painted to match, unless otherwise specified.

## Mounting

- Mounts to 2" x 4" handy box.

### PRODUCT DESCRIPTION

Recessed MR16 downlight luminaire with 1 3/4" square regressed pinhole aperture. Fixture has 50° visual cutoff to lamp and lamp image. Sealed Air-Loc housing eliminates leak-paths to ensure maximum energy savings and controls plenum sound transmission. Low profile TC housing is ideal for space restricted plenum applications and is for use in non-insulated areas, or where insulation is spaced at least 3" from housing.

### PRODUCT SPECIFICATIONS

**Reflector** .040" aluminum parabolic reflector in black Alzak finish shields housing interior.

**Trims Style** Die cast Self Flanged and Flush Mount reflectors utilize precision wound double torsion springs for tight, secure fit to ceiling  
• Flush Mount trims must be used with FMASQ4 Flush Mount Adapter.

**Lens** Lampholder accommodates up to three (3) 2" captive accessory lenses • Supplied with stippled clear uniformity lens.

**Socket** Ceramic bi-pin socket with double blade nickel alloy contacts • Quick disconnect for simplified maintenance.

**Lamp** One 75W MR16 lamp.

**Transformer** 120V High efficiency (>90%) dual tap magnetic, toroidal transformer has a boost tap to compensate for dimmer losses, improving color temperature and lumen output • Potted to eliminate noise and vibration • High efficiency (>94%), high power factor electronic transformer also available.

**Dimming** May be dimmed using dimmers specifically designed for low voltage magnetic or electronic transformers; consult factory or dimmer manufacturer for additional information.

**Codes/Labels** UL and cUL listed for through branch wiring, damp locations • Meets energy code Air Leakage requirements per ASTM E283 • Product thermally protected against improper use of lamps • Union made.

**Proprietary Bar Hanger System** Patent pending Pro-VI™, telescoping bar hanger system with locking set screws, permits quick placement of housing within 24" O.C. joists or suspended ceilings  
• Robust bar eliminates flexing regardless of fixture position  
• Integral T-bar notch with locking tabs secures housing to suspended ceiling grid • Captive bugle-headed ring shank nail for quick one-step installation • Bar Hanger foot aligns to bottom of construction joist and breaks away for use in suspended ceilings.

**Junction Box** Rated for 8 No. 12 AWG 90° C through branch circuit conductors and includes (5) 1/2", (1) 3/4", and (4) Non-metallic sheathed cable knock-outs • Push-In electrical connectors for field connections.

## ADVENT SPECIFICATION SHEET

REO INTERIOR WALL  
AIW10366

JOB NAME  
67 liberty st

TYPE  
j

ADA

Reo can be mounted to any wall surface and comply with ADA requirements while providing supplemental side illumination. Reo's unique light source orientation illuminates in front of and behind the decorative translucent panel, intensifying a 3D effect. The ability to complement any style comes standard.

### Dimensions

W	H	D	MC
13.0 in	28.0 in	3.7 in	14.0 in
33.0 cm	71.1 cm	9.4 cm	35.6 cm

### Weight

Hanging weight: 25.0 lb (11.4 kg).

### Features

- Formed metal construction provides durable protection for internal components and is recyclable.
- Embossed stainless steel-linear face plate option adds a unique, metal accent and texture to a space.
- Embossed stainless steel-linear and crosshatch face plate option adds a unique, metal accent and texture to a space.
- Durable wood laminate faceplate option adds a warm, natural texture to a space.
- Fixture adds a splash of color to a space with theatrical color gels. Standard colors are available with other colors available upon request. Contact factory to customize a color gel that coordinates with your application.
- Fixture adds texture to a space with architectural panels. Standard panels are available with other panels available upon request. Contact factory to customize an architectural panel that coordinates with your application.
- Standard thermoset polyester powder coat paint provides durable protection in a palette of color options. Custom colors available upon request.
- Integral electronic ballast utilizes the latest energy-saving technology to maintain consistent color temperature, CRI and lumen maintenance, while eliminating the need for remote mounting and simplifying installation.
- Compliant with Americans with Disabilities Act (ADA) requirements.

### Technical Notes

#### Electrical

- Fluorescent versions have integral electronic ballasts utilizing the latest energy-saving technology, providing prolonged lamp life and maintaining consistent color.
- Thermally protected ballast limits operating temperature.
- Class "A" sound rated ballast for use in low ambient noise applications.
- Meets NEC 410.73 double-ended, fluorescent lamp ballast disconnect requirements.
- ETL listed to UL standards (US and Canada) for use in damp locations. Not recommended for exterior applications.

### Lamping/lamp

- Lamps included, with the exception of T8, T5 and incandescent.

### Mounting

- Mounts to standard 4" octagonal junction box.
- Additional mounting structure and hardware required (by others).

### Additional Documents

## M450 SERIES Lumasense

**Motion Sensing Bi-Level Lighting System  
OSS/Advanced Occupancy Sensing System  
Integrated into a Vandal-Resistant Luminaire  
Linear T8 Fluorescent**

**Fixture Type:** \_\_\_\_\_

**Job Information:** \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

### SPECIFICATIONS:

- A unique new idea in energy savings and management. The Lumasense is a motion sensing bi-level vandal-resistant luminaire. It incorporates Mercury Lighting's latest technology, OSS/advanced occupancy sensing system. Compact design complies with all ADA requirements for public areas.
- Stairwells and similar low traffic public areas in commercial and residential buildings require lighting round the clock for safety and security. In reality, the occupancy of these areas can be nearly zero. The OSS technology provides a very low stand-by level of illumination. It uses an extremely sensitive ultrasonic occupancy sensor to detect any movement. It will even sense a stairwell door opening, where upon the luminaire instantly increases to full brightness. After occupancy is no longer detected the luminaire returns to the low stand-by level.
- The Lumasense is available with optional emergency battery back up to further fill the requirements for emergency egress from buildings. Emergency components are fully guarded inside the vandal-resistant luminaire. Various lumen output packages are available to meet state and municipal building and fire codes.
- The Lumasense with OSS technology is available with four different operating systems.
- System One: Programmed start 0-10Volt 2-lamp dimming ballast. Low voltage high frequency ultrasonic occupancy sensor internally mounted with a 24V power pack. Stand-by level power board internally mounted and factory set to 20%, 40%, or 60%. (+/- 5% due to line voltage variations.) Can be field reset to any of these levels or reset to 100%. This will be the output of the two lamps in stand-by mode. When movement is detected the luminaire instantly increases to full brightness.
- System Two: Programmed start 0-10Volt 2-lamp dimming ballast. Low voltage high frequency ultrasonic occupancy sensor internally mounted with a 24V power pack. Stand-by mode will be 5% output of the two lamps. When movement is detected the luminaire instantly increases to full brightness.
- System Three: One programmed start 1-lamp ballast and one instant start 1-lamp ballast. Low voltage high frequency ultrasonic occupancy sensor internally mounted with a 24V power pack. Instant start ballast operates one-lamp at 100% output. Programmed start ballast operates the other lamp in an off stand-by mode. When movement is detected this ballast instantly increases lamp to full brightness. After occupancy is no longer detected this ballast returns lamp to its off stand-by level.
- System Four: One programmed start 2-lamp ballast. Low voltage high frequency ultrasonic occupancy sensor internally mounted with a 24V power pack. Programmed start ballast operates both lamps in an off stand-by mode. When movement is detected this ballast instantly increases lamps to full brightness. After occupancy is no longer detected this ballast returns lamps to the off stand-by level.
- Housing: Fabricated from 20GA cold rolled steel with all internal steel parts riveted or screwed together. End caps are 16GA with a 5/8" drawn perimeter flange to securely overlap diffusers. Finished with a high quality white powder coating.
- Diffusers: Two diffusers per each luminaire are extruded from high impact acrylic with 50% DR added. Optional 100% DR available for added security. Diffusers are clear with internal linear prisms for brightness control.
- Lamps/Lengths: Two-lamp cross sections, T8 linear fluorescent. 2FT/17W-T8; 4FT/32W-T8.
- System One and Two Ballast: Two-lamp electronic dimming ballast, programmed start, high power factor, THD less than 10%. Multi-volt operates a range from 120V-277V, 50HZ-60HZ. Minimum starting temperature 50F.
- System Three Ballasts: One single lamp electronic ballast, programmed start. One single lamp electronic ballast, instant start. High power factor, THD less than 10%. Multi-volt operates a range from 120V-277V, 50HZ-60HZ. Minimum starting temperature 32F.
- System Four Ballast: Two-lamp electronic ballast, programmed start, high power factor, THD less than 10%. Multi-volt operates a range from 120V-277V, 50HZ-60HZ. Minimum starting temperature 32F.
- Occupancy Sensor: Watt Stopper FS-505 or equal, 40kHz ultrasonic sensor. Powered by a 24V internal power pack. Field adjustable time delay; 5, 10, 15 or 30 minutes. Field adjustable sensitivity. 72-hour lamp burn-in function.
- System One Power Board: Automatically dims ballast to factory set 20, 40, or 60% level. Can be field reset.
- Installations: Surface mounts individually, ceiling or wall orientation. Knockouts and four 1/4" mounting holes for secure anchoring. On request, row mounting, surface conduit entry, and surface mount junction box set-ups available.
- UL and CUL listed 1598 and bears their label. Suitable for dry locations or optional damp locations with UL Damp Label. Union made and labeled.
- Warranty: Five-year warranty on all electronic components; ballasts, occupancy sensor, power board. One-year on luminaire.

## ADVENT SPECIFICATION SHEET

### CENTERPOINT EXTERIOR WALL AEW10395

WET

An exterior, surface mount sconce, Centerpoint merges a contemporary look with artistic light design. Add a little flare to offices, schools and health care facilities with Centerpoint's modern light distributions and palette of powder coat and metal finishes. Choose which light pattern best enhances a design and even control the distribution size with the adjustable baffle option. If unspecified, Centerpoint's standard light distribution is an unobstructed circular pattern.

## WK301

## W3

**Wet Location**  
**Shower Light**  
**MR-16 Low Voltage Lamps**  
**4 1/8" Conoid Aperture**

### Optics and Applications

The parabolic cone provides excellent shielding and brightness control. The selection of MR-16 lamps offers beam spreads from 7° to 55°. Use in showers and other wet locations for general downlighting.

### Design Features

To prevent water entry fixtures are double gasketed, first between lens and cone, and then between ceiling and cone flange. Kurt Versen's proprietary lampholder assembly has a pronged aluminum heat sink and a reflective shield to divert heat from the bi-pin socket. The lampholder accommodates up to two accessories and pivots for relamping. Stainless steel springs hold the lamp firmly in place. A clear glass shield is standard on top of the cone. The trim assembly is non conductive. Maximum ceiling thickness 1 1/2". Top or bottom service.

### Finish

All cones and reflectors feature Kurt Versen Marine Grade anodic coatings which significantly exceeds the standard Alzak specification. A specular clear cone is standard, colors and Softglow® finishes are optional. Structural parts are phosphate conditioned, powder coated and baked matte black. Stray light leaks are contained and the final finish has exceptional scratch, impact, and wet environment resistance.

### Transformer

The magnetic transformer is capable of accommodating MR-16 lamps up to 75W. It is rated 180°C, Class H with a built-in 150°C thermal reset and can be lowered through the aperture for service. Maximum fixture draw is 85W.

### General

Fixtures are pre-wired, thermally protected, UL and C-UL listed for wet locations with eight wire 90°C branch circuit wiring. Union made IBEW.

### Accessories

B Black cone. HL Hexcell louver, at lamp.  
G Gold cone. LL Linear lens glass, at lamp.  
H Mocha cone. LP Large prism lens glass, at lamp.  
P Graphite cone. MP Microprism lens, at lamp.  
T Titanium cone. ET1 Electronic transformer 120V.  
W Wheat cone. ET2 Electronic transformer 277V.  
Y Pewter cone. R2 26" support rails.  
Z Bronze cone. R5 52" support rails.  
WT White trim flange. UV UV filter, contact factory.  
WHP White powder coated complete trim.  
RMR Residential mounting rails.  
V277 277 volt primary transformer, magnetic.  
WRL Wattage restriction label, specify wattage.  
FR Frosted lens. Example: LLFR for linear lens frosted.  
FLC4 Full lens cone, specify lens type, e.g. FLC4MP.  
S Softglow® finishes: add S before color letters. e.g. SW for Softglow® wheat cone, SC for Softglow® clear cone.

Number	Lamps	85°	75°	65°	55°	45°
WK301	50W MR-16 EXN 40°	3	16	27	40	80
	75W MR-16 EYC 40°	4	23	35	56	108

Data in footlamberts. Photometer readings, Maximum Brightness Method. See note 6.

## Notes

- 1 Data on all charts calculated using a clear specular cone finish.
- 2 Specular cone multipliers: Gold x .97, Wheat x .96, Pewter x .94, Mocha x .93, Graphite x .90, Titanium x .90, Bronze x .85, Black x .70.
- 3 Softglow® cone multipliers: Clear x .98, Gold x .96, Wheat x .87, Pewter x .73, Mocha x .73, Graphite x .73, Titanium x .73, Bronze x .68, Black x .62.
- 4 Single unit pattern diameters are determined by the number of degrees from each side of nadir. Therefore a 5° diameter represents a total 10° pattern width at the work plane 30" above the floor. Footcandle values are at the edge of that diameter.
- 5 Datachart spacing is rounded off to the nearest foot.
- 6 Brightness data from the Average Luminance Method are inaccurate for downlights. They are theoretical calculations for large surfaces such as troffer lenses. We recommend the stricter standard of Maximum Brightness Method point data from direct photometer readings. They approximate what the human eye perceives when evaluating glare. For more information refer to Z section brochure Z1.

**PG**

**Indoor/Outdoor Emergency Lighting Unit**

**FEATURES**

**Application**

The PG is an indoor/outdoor, die-cast architectural emergency unit. It is a wet location listed, emergency luminaire with high-output LED technology that provides path of egress illumination for mounting over entrance/exit ways and perimeter walkways. Spectron® self-testing/self-diagnostic electronics are included standard. A battery heater for cold temperature operation is available as an option.

**Construction**

Housing and mounting plate are constructed of 0.125" die-cast aluminum and 0.125" closed-cell, medium density, neoprene gasket. The acrylic lens allows 92% light transmission. The reflector is electro-polished aluminum with 95% reflectance. Housing finish is powder coated electro-deposition paint available in four colors: dark bronze, white, platinum silver and black.

**Installation**

Universal housing knockouts for mounting to standard 3 1/2" and 4" octagon and 4" square electrical boxes. A 1/2" - 1/4 NPT threaded conduit opening is provided at the top of the housing and sealed with a closure plug. The back plate mounts to the wall surface using installer supplied hardware. The housing "snaps" to the back plate by a "pin and socket" arrangement, and is secured with two Fillister head screws. AC Lockout feature prevents battery discharge prior to initial unit power-up saving installation time.

**Lamps**

Four high-output, long life LED lamps arranged in redundant pairs.

**Compliances**

- UL 924 Listed (emergency models only)
- UL Wet Location Listed
- NFPA 101 Life Safety Code
- NFPA 70 National Electrical Code
- OSHA

**Warranty**

Three-years full for unit, electronics and battery.

**PG****Indoor/Outdoor Emergency Lighting Unit****SPECIFICATIONS****Electronics**

Upon failure of the normal utility power, a solid-state transfer switch automatically activates the emergency lamp. Upon resumption of the normal utility power, the battery is disconnected from the load and recharged through a solid-state charging unit. A low voltage battery disconnect feature protects the battery from severe damage during prolonged power failures. Spectron® self-testing/self-diagnostic circuitry provides automatic system testing on a monthly and semi-annual basis. Manual testing is available at any time using the push-to-test button: push once for a 60-second system test; push twice for a 90-minute system test.

Number of Lamps: Four high output LEDs

Lamp Configuration: Two sets of 2 LEDs provide illumination. In the unlikely event that any single LED should fail the remaining LEDs will continue to function.

Lamp Type: Solid state high output LEDs

Lamp Color: Cool White, 6350K

Total Lamp Output: 405 Lumens

Input: 120/277VAC, 60 Hz

Battery Charger: Temperature compensating, constant current

Transfer: Solid state

Functional Circuitry: AC lockout, transformer isolation, transient surge protection, low voltage battery disconnect, brownout detection, time delay retransfer

Battery Recharge Cycle: per UL time standards

Test Means: Integral test switch

Battery: Sealed, maintenance-free Nickel-Cadmium

Operating Temperature Range for Models without Heater:

0°C to 50°C (32°F to 122°F)

Operating Temperature Range for Models with Heater:

-30°C to 50°C (-22°F to 122°F)

ELA-LI11-17083

Catalog Number	
Notes	Type

**Description:**

The Encore "Uno" Series is a fully universal LED Edgelit Exit Sign with a brushed die cast aluminum housing and trim plate. A tapered injection molded acrylic panel hangs from the trim plate. The acrylic panel utilizes an invisible hinge and removeable arrows that allow the installer to choose all combinations of surface or recessed mounting including arrow configurations in the field.

**Housing:**

The Uno housing is constructed of die cast aluminum with a brushed finish standard. The housing includes adjustable mounting bars to allow for a flush fit to the ceiling. The housing is shipped with mounting bars installed for recessed mounting, simply remove the mounting bar assembly to configure the housing for surface mounting. 3/4" conduit knockouts are included in the top and side of the housing.

**Trim Panel Assembly:**

The trim assembly is constructed of die cast aluminum with a brushed finish standard. The trim assembly can be configured in the field for recessed ceiling or wall installation, as well as surface mounting. The die cast trim assembly attaches to the housing using captive, recessed concealed screws to ensure a tight, flush fit to the ceiling. The panel assembly is constructed of injection molded acrylic, tapered for a slim appearance. The panel assembly consists of 2 halves allowing the installer to choose single or double faced installation in the field. The panel halves are held together with an invisible hinge, allowing panel configuration to be changed easily in the field. All panels have removable arrows applied in the factory allowing arrows to be removed in the field to achieve all arrow combinations.

**Electronics/Battery:**

Both Battery and AC only units accept input of 120/277 VAC, 60 Hz. Power consumption is 1.9 watts. Battery backup models use maintenance free NiCad batteries. Charging is accomplished with a constant current charger capable of recharging as per UL924 standards. No mechanical relays are used, transfer is accomplished using solid state circuitry.

**LED Illuminator:**

The LED Illuminator consists of 10 Ultra bright Piranha LEDs. The Piranha LED has a nearly 180 degree emitting angle allowing for even illumination. The LEDs are wired in sets of two, insuring that in the unlikely event of a single LED failure, the sign will continue to be illuminated.

**Approvals/Warranty:**

UL924 listed, Life safety NFPA 101, NEC/OSHA, New York City approved. LED Illuminator warranted for 25 years, charger covered by 3 year warranty, NiCad batteries covered by 10 year warranty, 3 years complete, 7 years prorated.

## 4" LOW VOLTAGE UNIVERSAL TC HOUSING

50W MR16  
TC44

Project: \_\_\_\_\_

Fixture Type: \_\_\_\_\_

Location: \_\_\_\_\_

Contact/Phone: \_\_\_\_\_

### PRODUCT DESCRIPTION

TC Housing design for use in non-insulated areas • If installed where insulation is present, the insulation must be pulled back 3" from all sides of the TC housing.

### PRODUCT SPECIFICATIONS

Lamp One 12V, 50W MR16 lamp.

Socket Ceramic bi-pin socket with aluminum heat shield.

Trims Trim selection shown on reverse.

Transformer 120V to 12V 50VA thermally protected magnetic transformer mounted to junction box.

Dimming May be dimmed using dimmers specifically designed for low voltage magnetic transformers; consult factory or dimmer manufacturer for additional information.

Labels U.L. listed for through-branch wiring, damp locations and IP • Product thermally protected against improper use of lamps or insulation • Union made • UL Listed/CSA certified • Trim No. 441, 4401, 4402 and 4481 are wet location approved for covered ceiling applications.

Testing All reports are based on published industry procedures; field performance may differ from laboratory performance.

Product specifications subject to change without notice.

### INSTALLATION

Real Nail 3 Bar Hangers Telescoping, patent-pending Real Nail 3 system permits quick placement of housing anywhere within 24" O.C. joists or suspended ceilings • Integral T-bar notch and clip secures housing in suspended ceiling grid – no accessory clips required • 24" expansion stop allows quick placement of fixture in standard grid spacing • Bars scored in two locations for fast, clean breaking, allowing housing installation in tight applications • Bars captive to mounting frame • Edge-mounted for extra strength • Captive bugle-headed ring shank nail for quick one-step installation and easy removal with claw hammer for fixture relocation • Quick-Loc slot and oversized locking set screw lock fixture in position • Bar hanger foot contoured to align to bottom of construction joist • Alternate mounting holes included.

Junction Box Pre-wired junction box provided with (5) 1/2" and (1) 3/4" knockouts, (4) Non-metallic sheathed cable connectors and ground wire, U.L. listed/CSA certified for through-branch wiring, maximum 8 No. 12 AWG 90° C branch circuit conductors (4 in, 4 out) • Junction box provided with removable access plates • Knockouts equipped with pryout slots.

Mounting Frame 22-gauge die-formed galvanized steel mounting frame • 10 1/4" L x 5 3/4" W, (excluding bar hangers) • Rough-in section (junction box, mounting frame, housing and bar hangers) fully assembled for ease of installation.

Housing TC housing, 22-gauge galvanized steel • Housing is vertically adjustable to accommodate up to a 1 1/4" ceiling thickness.

## CL Series

### Concealed Recessed Emergency Luminaire

Catalog Number	CL-100	Type	EXIT
Comments			

#### FEATURES

##### Application

The CL series is a recessed, self-contained emergency light with fully automatic operation suitable for wall or ceiling mount applications. With its high wattage lamp offering it offers concealed and unobtrusive emergency lighting compliance for small and large open floor-plans. Two flat panel doors are flush with trim and mounting surface. Upon loss of power, the doors automatically open and reveal the emergency lighting lamp-heads.

##### Construction

Back-box made of galvanized 20 gauge steel. Galvanized bar hangers span up to 30" on center. Trim and door panels in durable white powder coat finish. Can be wall-papered or field painted. Trim and panel doors are mounted flush with surface with no exposed hardware.

##### Installation

Wall or ceiling mount. The CL is fully recessed by means of a steel back-box complete with fully adjustable mounting hardware. The modular assembly and quick connector design allow for fast and easy installation. T-bar clips secure unit to grid in ceiling mount applications. Rough-in dimensions: 13.5" X 6.75", allow 5.5" for panel opening clearance.

##### Illumination

The CL series provides illumination with two adjustable 12 through 75 watt MR-16 Halogen lamps rated for 2,000 hours of operation. Soft start lamp circuit allows for extended lamp life.

##### Compliances

UL 924 Listed to 924 Standard  
NFPA 101 Life Safety Code  
NFPA 70 National Electrical Code  
OSHA

##### Warranty

Full three-year warranty.

*12-Volt, self-diagnostic with time-delay, sealed lead-calcium or NiCad battery with remote capacity*

#### ACCESSORIES Order Separately

Part Number	Description
CLRI	Remote Diagnostic Indicator
CLRT	Remote Testing Transmitter
CLRK	Rough-in Kit
CPCLRK	Chicago Plenum Listed Rough-in Kit

#### ORDERING GUIDE

CL	50	N	H20	-CP
Series	Capacity	Battery Type	Lamp Wattage	Options
	50 - 50 Watts <sup>1</sup> 100 - 100 Watts <sup>2</sup> 150 - 150 Watts	Blank - Lead Calcium N - Nickel-Cadmium	H12 - 12 Watt Halogen H20 - 20 Watt Halogen H35 - 35 Watt Halogen H50 - 50 Watt Halogen H75 - 75 Watt Halogen	-CP - Chicago Plenum Rated <sup>4</sup> -XK - Less Rough-in Kit <sup>3</sup>

<sup>1</sup> Not available with H35, H50, or H75 lamps

<sup>2</sup> Not available with H75 lamps

<sup>3</sup> To order the rough-in kit only for early installation, add "-XK" option suffix to CL model number and order "CLRK" separately.

<sup>4</sup> For Chicago Plenum rated, order CL model number plus "-XK-CP" and order the "CPCLRK" separately.

## CL Series

### Concealed Recessed Emergency Luminaire

#### SPECIFICATIONS

##### Electronics

Dual-voltage input of 120/277VAC. Precision controlled motor and cam system ensures smooth and reliable opening and closing of light source. LED indicator provides visible fault detection and AC-On indication. Test switch provides manual activation of a 30-second diagnostic test.

##### Standard Features Include:

- Self-test, self-diagnostics monitors lamp load transfer circuit, battery capacity, operation and motor drive. 28 day self-test.
- Brownout protection
- Low voltage disconnect prevents deep discharge of the battery
- Voltage polarity protected by use of polarized connector
- 15 minute time delay re-transfer
- Fused remote leads for units with remote capacity

##### Optional Accessories

**CLRT-** Remote IR Testing Transmitter. Selectable 30-second or 90-minute remote testing. Only one required for multiple units.

**CLRI-** Remote Diagnostic Indicator Display.

##### Operating Temperature Range

Lead Calcium Battery: 16°C to 32°C (60°F to 90°F)

Nickel Cadmium Battery: 0°C to 38°C (32°F to 100°F)

**Overall Size:** 16"L X 13.5"W X 4"D

**Weight:** 23-31 lbs. depending upon capacity

#### REMOTE CAPACITY CHART
