

LUMIERE XXL

DESIGN RODOLFO DORDONI/2009

Twenty years after the birth of Lumiere, Lumiere XXL was born, a product that has been completely redesigned, in accordance with its new proportions and for its specific use. The tripod is still made of metal but has a more decisive feel and the blown glass diffuser has also acquired a new geometry. When placed on a desk or table, Lumiere XXL characterises the entire space around it, not only thanks to its size, but also by combining different colours for the tripod and the diffuser: all black, all white, or white and gold, black and gold, or white and black.
